

Dawid Zębacki

Frontend developer

Hello, my name is Dawid. My passion is web development. Crafting intuitive, functional websites and applications is really enjoyable for me. I am highly motivated to learn new things and expand my horizons on this area. Creativity, great sense of style and focusing on users are some of my advantages. I know how a modern website with a good UI should look like.

Tools

VS Code, Vim, npm, Gimp, Moqups, Adobe Illustrator, Inkscape, Webpack, Babel.

Languages

Polish - Native, English - Advanced (B2), Norwegian - Basic (A1).

Experience

Tile layer - Per Kristian Tranberg, *Every holiday since '10*

Per Kristian Tranberg is a company in Norway. It's my first employer. When I was a teenager I collected strawberries. Then I got a promotion to construction section and mostly I worked as tile layer. If it was a lot of work e.g. in carpentry I was headed right there to help other employees. This work taught me respect for hard work and it strengthened my character.

Front-end developer - Ansta | Smart Solutions, *August '19 - November '19*

It was my first job at IT area. I increased my abilities especially with programming and creating intuitive user interface. In this job I was implementing features which my colleagues invented so I learned how to get along with them. It taught me how to communicate with people to be understood well. I was also designing and developing my own solutions which was really fun for me.

Software developer - LasMedia, *January '20 - actually*

It's freelancing project of me and friend of mine. We are developing websites for real clients from scratch and maintaining these which we are done. Client has possibilities to add his data because of CMS that we created. Technology stack is Gatsby and Netlify CMS.

Education

V Liceum Ogólnokształcące im. Zbigniewa Herberta w Słupsku,
September '11 - May '14

Pomeranian University in Słupsk, *October '15 - February '19*
Graduate engineer of Technical - Informatics Education.

Projects (all projects are available on my github account)

Reflex Game, reflexgame-dawidzebacki.netlify.app

The main rule of this game is that you have to click the tile that lights up green. If you will wait too long, your life will be decreased by one. Same situation is if you make a mistake and choose wrong tile. Your time is 60 seconds.

Oczko, oczko-dawidzebacki.netlify.app

It's the other version of blackjack. You can play vs AI or with friends. Everybody is taking 2 card on the beginning. Then you can take card or don't. Person who is the closest to the 21 points is a winner.

Sport Quizz, sportquizz-dawidzebacki.netlify.app

Pure HTML/CSS/JS. It's a quizz type application. You have to pass through 10 questions related to football, hockey and others. There always random questions from 30 of them. The choices are mixed if you start again. At the end you can save your score to the high scores table. Application is showing top 5 scores from the local storage

CodeWars, github.com/dawidzebacki/CodeWars

There you can see all algorithms of mine. I am really enjoying these types of problems. That's how I like to spend my free time.

Przedszkole Przytulanka, przedszkoleprzytulanka.pl Parafia Wesoła, parafiawesola.pl

Our two biggest projects for LasMedia that I've developed with my friend. You can't see the code unfortunately because that is also belonging for the client now.

choose a job you love and you will never have to work a day in your life

„I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation)”.
